

PRESS RELEASE 20/07/10

### INTRODUCING THE FIREWIRE DEVIANT FIN

Firewire Surfboards will be previewing an exciting new product at HUB 2010- THE DEVIANT FIN.

The DEVIANT automatically adjusts 7 degrees of cant in either direction (14 degrees total range of movement) and noticeably increases speed and responsiveness by reducing rear fin drag, loosening the tail, and shortening the turning radius of a thruster fin set up: your board will feel faster and more maneuverable.

The DEVIANT will come in FCS and Futures compatible versions and will be previewed at HUB 2010.

There will be demo fins at all retailers so you don't have to take out word for it, just try it!
